## problems of cryobiology and cryomedicine, volume 33

$\alpha$ -2-macroglobulin 50

### a

acid hyaluronic 133

activity

*metabolic* 14

*phagocytic of neutrophils* 3

adaptation cold 268

adjuvant arthritis 144

age 268

agents cryoprotective 177

alginate microcapsules 263

analysis regression 212

aneuploidy 177

antibiotic resistance 115

antioxidants 227

apoptosis, stages of 122

arthritis adjuvant 144

autoimmune diseases 77

automated vitrification 177

### b

bay leaf 38

biologically active substances 250

blood cord 250

*human, leukoconcentrate* 227

*nucleated cells* 122

*cryopreserved* 201

blood leukocytes 268

brain cortex morphology 193

### c

calorimetry 55

catalase 263

cell (-s)

*therapy* 77

*cryopreserved* 59

*dendritic* 77

*tolerogenic* 144

*mesenchymal stromal of human umbilical*

*cord* 133

*mononuclear* 144

*nucleated, cord blood* 122

*cryopreserved* 201

*placental cryopreserved* 274

*spermatogonial* 77

changes epigenetic 177

chemotherapy-induced ovarian failure 274

chlorophyll fluorescence 25

chromatography

*gas* 38

*gel permeation* 3

cognitive functions 201

cold 193

*adaptation* 268

*exposure continuous long-term* 193

*exposures short-term intermittent* 193

*tolerance* 212

concentration 139

conditioned medium 133

continuous cold exposure long-term 193

cooling 25

cord blood 250

*nucleated cells* 122

*cryopreserved* 201

*human, leukoconcentrate* 227

cord umbilical of human

*cryoextract* 133

*mesenchymal stromal cells* 133

cortex brain, morphology 193

cranio cerebral hypothermia 50

*rhythmic* 201

cryodestruction 250

cryoextract (of)

*fetal tissues* 3

*human umbilical cord* 133

*placenta* 3

cryopreservation 14, 77, 122, 133, 144

cryopreserved

*cells* 59

*nucleated, cord blood* 201

*placental* 274

cryoprotectants 55, 103

cryoprotective

*agents* 177

*solutions* 14

cryoresistance 25

cultivation 139

cyanobacteria 25

cyclophosphamide-induced ovarian failure 59

cytokines 144

### d

dendritic cells 77

*tolerogenic* 144

dimension, fractal 193

diseases autoimmune 77

dismutase superoxide 263

disorder, stress post-traumatic 77

DMSO 122  
dysfunction of reproductive system 77

## e

epigenetic changes 177  
erythrocytes 103  
*Escherichia coli* 115  
exposure, cold  
    *continuous long-term* 193  
    *short-term intermittent* 193  
extract 38, 59

## f

failure ovarian  
    *chemotherapy-induced* 274  
    *cyclophosphamide-induced* 59  
fetal tissues cryoextract 3  
fibroblasts 133  
fluorescence chlorophyll 25  
fractal dimension 193  
fraction low-molecular 250  
fragments 274  
    *placental* 59  
freeze-drying 139  
freeze-warming 263  
freon R406A liquefied 38  
functions, cognitive 201

## g

gas chromatography 38  
gel permeation chromatography 3  
glucose oxidase 263

## h

heat shock proteins 144  
human  
    *cord blood, leukoconcentrate* 227  
    *oocytes* 177  
    *umbilical cord cryoextract* 133  
    *umbilical cord mesenchymal stromal cells* 133  
hyaluronic acid 133  
hybrids 212  
hypothermia  
    *craniocerebral* 50  
    *rhythmic* 201  
    *immersion* 50

## i

immersion hypothermia 50

## l

leaf bay 38  
learning 201  
leukoconcentrate of human cord blood 227  
leukocytes of blood 268  
lichens 25  
life, quality of 274  
lifespan 59  
lines 212  
liquefied freon R406A 38  
long-term continuous cold exposure 193  
low temperatures 55, 250  
    *technologies* 38  
low-molecular fraction 250  
lyophilization 227  
lyophilized museum strains 115  
lyoprotectants 227

## m

mass transfer 103  
medium  
    *conditioned* 133  
    *protective* 139  
meiotic spindle 177  
memory spatial 201  
mesenchymal stromal cells of human umbilical cord 133  
metabolic activity 14  
microalgae 14  
microcapsules alginate 263  
model physico-mathematical 103  
moderately low temperatures 115  
mononuclear cells 144  
morphology of brain cortex 193  
museum strains, lyophilized 115  
mycobacteria 139

## n

neutrophils phagocytic activity 3  
nucleated cells of cord blood 122  
    *cryopreserved* 201  
number of odour units 38

## o

odour units, number of 38  
oncology pathology 77  
oocytes human 177  
osmotic reaction 177  
ovarian failure  
    *chemotherapy-induced* 274  
    *cyclophosphamide-induced* 59  
oxidase glucose 263  
oxidative stress 177

## p

pathology oncology 77  
phagocytic activity of neutrophils 3  
phase transitions 55  
photosynthesis 25  
photosystem II 25  
physico-mathematical model 103  
placental  
    *cells cryopreserved* 274  
    *cryoextract* 3  
    *fragments* 59  
polar regions 25  
post-traumatic stress disorder 77  
potential transmembrane 103  
protective medium 139  
proteinases 50  
proteins of heat shock 144

## q

quality of life 274

## r

rats 50  
    *spontaneously hypertensive* 201  
reaction osmotic 177  
regions polar 25  
regression analysis 212  
reproductive system dysfunction 77  
resistance antibiotic 115  
rhythmic craniocerebral hypothermia 201

## s

short-term intermittent cold exposures 193  
solutions cryoprotective 14  
spatial memory 201  
spermatogonial cells 77  
spindle meiotic 177  
spontaneously hypertensive rats 201  
stages of apoptosis 122  
strains museum, lyophilized 115  
stress  
    *disorder post-traumatic* 77  
    *oxidative* 177  
substances biologically active 250  
sucrose 55  
sunflower 212  
superoxide dismutase 263  
system reproductive dysfunction 77

## t

temperature 277  
technologies low-temperature 38

temperature 139  
    *low* 55, 250  
    *moderately* 115  
therapy cell 77  
tissues fetal cryoextract 3  
tolerance cold 212  
tolerogenic dendritic cells 144  
toxicity 14  
transfer mass 103  
transitions phase 55  
transmembrane potential 103  
trolox 122

## u

umbilical cord of human  
    *cryoextract* 133  
    *mesenchymal stromal cells* 133

## v

viability 139  
vitrification 177  
    *automated* 177
