

key word index

problems of cryobiology and cryomedicine, volume 34

a

acid

- ascorbic 54
- hyaluronic 33
- salicylic 125

actin filaments 186

activity metabolic 186

adaptation, cold 143

adjuvant arthritis 268

age 143, 201

agent cryoprotective 19

aging 33

amphiphilic compounds 19

arousal dynamics 251

arthritis adjuvant 268

ascites carcinoma Ehrlich's 226

ascorbic acid 54

assessment risk 71

atopic dermatitis 282

b

bacterial contamination 71

bacterization 125

biologically active substances 54

biometric parameters 113

blood

- cord 165

 - cells human Коваль

- leukocytes 201

bone marrow mononuclear cells 268

C

carcinoma Ehrlich's ascites 226

cell (s)

- therapy 165

- dendritic tolerogenic 268

- mononuclear bone marrow 268

- cord blood human 282

- immune dendritic 226

- mononuclear 226

- progenitor haematopoietic 71

- stem 33, 165

- stromal mesenchymal 186

ciliary body 45, 213

clustering effect 251

cold

- adaptation 143

- resistance of plants 125

- stress 125

compounds amphiphilic 19

conservation energy 251

contamination bacterial 71

control temperature intra-operative 3

cooling 213

cord

- blood 165

 - cells human 282

- umbilical 33

cryobank 71,

cryodamage 236

cryodestruction 45

cryoextract 33, 54

cryolysate 226

cryopreservation 33, 71, 165, 236, 282, 268

cryoprotective agent 19

cryostimulation whole body 201

cryosurgery 3,

cultivation 261

culture medium 261

culturing 226,

cycles temperature 251

cytokines 282

d

deficiency oxygen 71

deglycerolization 19

dendritic cells

- immune 226

- tolerogenic 268

dermatitis atopic 282

desynchronosis 201

dynamics

- arousal 251

- germination 113

e

effect clustering 251

Ehrlich's ascites carcinoma 226

embryos pre-implantation 236

energy conservation 251

epibulbar tumour 45

erythrocytes 19

exposure low temperature 3

extraction medium 54

f

filaments actin 186,

freezing 19, 261

g

germination dynamics 113
glycerol 19
grafts vascular 71

h

haematopoietic progenitor cells 71
hormone (s),
 thyroid-stimulating 143
 thyroid 143
Hsp70 268
human cord blood cells 282
hyaluronic acid 33
hypothermia 213
hypothermic storage 186

i

immune dendritic cells 226
indices integral leukocyte 201
infrared thermography 45
integral leukocyte indices 201
intra-operative temperature control 3

l

Leukocyte s,
 indices integral 201
 blood 201
liquid nitrogen storage 71
low temperatures 113
 exposure 3
lyophilization 282, 261

m

medium
 culture 261
 extraction 54
mesenchymal stromal cells 186
metabolic activity 186
mononuclear cells 226
 bone marrow 268
mycobacteria 261

n

nervous system pathologies 165
nettle 54
nitrogen liquid storage 71

o

ocular surface temperature 213
ophthalmology 213
ovariectomy 33
oxygen deficiency 71
ozonation 113

p

parameters biometric 113
pathologies nervous system 165
Phaseolus vulgaris 125
Pisum sativum 125
plants cold resistance 125
posthypertonic shock 19
prednisolone 282
pre-implantation embryos 236
progenitor cells haematopoietic 71

r

rabbits 213
rats 33, 143, 201
regulatory T-cells 268
risk assessment 71

s

salicylic acid 125
seeds 113
shock posthypertonic 19
skin 33
soft tissues 3
spheroids 186
state torpid 251
stem cells 33, 165
storage
 hypothermic 186
 liquid nitrogen 71
stress *cold* 125
stromal cells mesenchymal 186
substances biologically active 54
system nervous pathologies 165

t

T-cells regulatory 268
temperature (s) 261
 control intra-operative 3
 cycles 251
 low exposure 3
 ocular surface 213

- surface ocular 213
- low 113
- therapy cell 165
- thermography 3
 - infrared 45
- thermoregulation 251
- thyroid hormones 143
- thyroid-stimulating hormone 143
- tissues soft 3
- tolerogenic dendritic cells 268
- torpid state 251
- transplantation 71
- tumour epibulbar 45

U

- umbilical cord 33
- uveitis 213

V

- vascular grafts 71
- viability 186
- vitrification 236

W

- wheat winter 113
- whole body cryostimulation 201
- winter wheat 113
